

MAHIMA THAKAR

📍 Brisbane, QLD | 📞 +61 415 216 391 | ✉️ mahi.brissie25@gmail.com
LinkedIn: linkedin.com/in/mahi-thakar-2612mjt | **Projects:** github.com/mahi122602
Portfolio: mahima-portfolio-one.vercel.app

PROFESSIONAL SUMMARY

QUT Data Science postgraduate with a Computer Science engineering degree and hands-on experience in machine learning, analytics and application development. Builds predictive models and interactive dashboards, with research in athlete digital twins and forecasting. Brings technical teaching, Agile teamwork and student leadership experience.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, HTML/CSS | **Frameworks:** Streamlit, React, FastAPI

Data and AI: Data cleaning, EDA, feature engineering, statistical analysis, regression, classification, deep learning, anomaly detection, time-series forecasting, model evaluation and explainable AI

Libraries: pandas, NumPy, scikit-learn, PyTorch, TensorFlow/Keras, XGBoost, SHAP, OpenCV

Analytics and databases: Power BI, Excel, PostgreSQL, Supabase, Plotly, Matplotlib, Folium

Development: Git/GitHub, Vercel, Streamlit Cloud, REST APIs, Microsoft Power Platform, MCP prototyping, functional testing, debugging and Agile/Scrum

RESEARCH EXPERIENCE

QUTwin Athlete Digital Twin | QUT Capstone | Ongoing

- Developing athlete and coach decision support for performance, fatigue, readiness and injury-risk indicators; investigating Bayesian updating, state-space modelling, time-series forecasting and uncertainty.
- Built Streamlit/PostgreSQL workflows for profiles, wearable uploads, dashboards, recommendations and what-if simulations; improved responsiveness and prototyped MCP access to application services

SELECTED PROJECTS

QUTwin – AI-Driven Athlete Digital Twin | Ongoing

- Developing a Python/Streamlit and PostgreSQL platform integrating athlete performance dashboards, fatigue and readiness forecasting, personalised recommendations and what-if simulations; prototyped MCP integration for intelligent athlete-coach support.

AI-Powered Urban Crisis Intelligence System for Brisbane 2032

- Deployed a Python/Streamlit prototype integrating live weather, traffic incidents and venue maps; developed ML risk classification on simulated scenarios with SHAP insights and Plotly/Folium visualisations.

Traffic Anomaly Detection Using Deep Learning

- Built a PyTorch convolutional autoencoder pipeline on ShanghaiTech surveillance data, using OpenCV frame extraction, reconstruction-error scoring and visual outputs to inspect anomalies.

Australian Skills Shortage Analysis

- Developed a PostgreSQL and Power BI dashboard analysing Australian labour demand, workforce shortages and hiring trends.

PROFESSIONAL EXPERIENCE

STEM Instructor – Coding and Robotics | Junior Engineers | Aug 2025–Present

- Deliver coding and robotics workshops, translating technical concepts into practical STEM and problem-solving activities.

Customer Service and Data Assistant | Priti's Kitchen | Sep 2023–Jan 2025

- Analysed sales and operational data in Excel; improved data tracking and reporting accuracy for business decisions.

App Development Intern | Sandvik Mining and Rock Technology | Mar 2023–May 2023

- Contributed to Microsoft Power Platform applications, UI/UX improvements and testing within an Agile team.

Customer Service Officer | Cascade, Brisbane | Nov 2025–Dec 2025

Assisted customers with enquiries and service requests, communicating clearly and coordinating with team members to resolve issues efficiently.

EDUCATION

Master of Data Science | Queensland University of Technology, Australia | 2025–Present

Bachelor of Engineering in Computer Science | DYPIEMR, India | 2020–2024

LEADERSHIP AND PROFESSIONAL SKILLS

Scrum Master, QUTwin: sprint planning, task coordination and progress communication. **International Postgraduate Student**

Member, QUT University Academic Board. HR Officer, 180 Degrees Consulting, QUT. Strengths: Analytical problem-solving, technical communication, mentoring, stakeholder communication, teamwork, adaptability, time management and attention to detail.
